

## How Ion Cleanser Works

The water module utilizes low voltage direct current to separate the water molecule into positive and negative ions. The ions travel through the body, attaching to and neutralizing oppositely charged particles, and osmosis pulls the neutralized particles out through whatever surfaces are exposed to the water. . . . I can regulate the ion mix according to the pH of the body by changing the direction (polarity) of the electrical flow. The positive polarity produces more negative ions, and the negative polarity more positive ions . . . . Actually, I determine what ion mix the body wants through muscle testing, but there seems to be a strong correlation between saliva pH and what the body tests for . . . . Keep in mind that positive and negative are electrical terms that refer to the poles that the current flows to; not the predominant ion charge. The colors and the sludge in the water are produced by the ionization interaction of the current flow, the metal in the module and the toxins in the water and body. (Explore 2002; Moroney 2004).

How the IonCleanse® works. Generating ions. An ion is a charged atom that has gained or lost an electron which creates a magnetic field capable of attaching to and neutralizing oppositely charged particles. These neutralized particles are extracted from the body through the process called osmosis. Osmosis is a scientific term that is used to describe the movement of particles through a membrane from an area of lower concentration to an area of higher concentration. In this case, the higher concentration refers to the ion field that is set up by placing the array into the water while running the unit.

The array is placed into the water alongside the hands, feet, or body while the power supply delivers a low level direct current to the array. This causes the metals within the array in combination with water and salt to generate charged ions by separating the oxygen and hydrogen in the water.

The practitioner determines the polarity setting through the use of litmus paper (pH strips) or muscle testing. We speculate that ions generated by the IonCleanse® travel through the body attaching themselves to a multitude of toxic substances, thereby neutralizing their positive or negative charge. It may be possible to reduce pain and other symptoms caused by a lifetime of toxic buildup in the body (assuming the symptoms are caused by toxic buildup). The long-term effectiveness of the IonCleanse® purification process depends on other life-enhancing changes a person is willing to make.

Robert Moroney further states:

<p>We have also found that a person’s purification session will override the geographical toxicity of the water based on *EAV (Electroacupuncture by Voll) testing, the following table shows what we believe the colors in the water represent: (Moroney 2004) Color of Particle</p>	<p>Material or Area of the Body</p>
---	-------------------------------------

Yellow green	Purifying the kidney, bladder, urinary tract, female/prostate area
Orange	Purifying joints
Brown	Purifying the liver
Black	Purifying the liver; tobacco, cellular debris
Dark green	Purifying the gallbladder
White foam	Lymphatic system
White cheese-like particles	Most likely, yeast
Black flecks	Heavy metals
Red flecks	Blood clot material
